- Questions

Project Overview

- There is an existing, substandard weir measurement structure for the ditch north of Baseline Road and east of the South Platte River.
- The structure is used for the measurement of City augmentation water flows and reports data through the City's SCADA system.
- The ditch conveys stormwater runoff as well.
- A more accurate measurement structure, which can account for a wider range of flows, is needed for proper augmentation accounting.

Procurement Summary

PROCUREMENT METHOD:

Formal Solicitation, advertised via BidNet, resulting in seven (7) responses.

BIDS RECEIVED:

Bid 1: \$378,595.00

Bid 2: Not Responsive

Bid 3: \$589,785.00

Bid 4: Not Responsive

Bid 5: Not Responsive

Bid 6: \$324,687.75

Bid 7: Not Responsive

STAFF RECOMMENDATION:

Accept Bid 1, submitted by American West Construction, LLC, as this Bid has been deemed the lowest most responsive and responsible of those received. As demonstrated through their Bid, the Firm has experience with successful construction of structures similar in nature to those required by this project. The Bid falls within the City's budget and project timeline.

BrightonSM

Options for City Council

- None at this time. Staff is requesting Council permission to add this item to the Consent Agenda at the next regular City Council meeting.

Questions
