# Project Background

## Brighton Transportation Master Plan 2023

Updated; 2023

# Project Background

# Background

Brighton has experienced significant growth since the adoption of the previous TMP in 2016 and has successfully completed a number of previously identified goals. These goals were accomplished through a strategic transportation capital investment program that is map-based and tied directly to performance monitoring and reporting. As the City of Brighton looks to the future, these goals have been reevaluated based on current social and economic regional trends to ensure that Brighton's TMP stays consistent and relevant to current and anticipated growth

Brighton<sup>SM</sup>

# Project Background

## Transportation Goals

- 1.** *Brighton will prioritize safety in transportation planning and design*
- 2.** *Brighton's transportation system will be well-connected and accommodate all modes.*
- 3.** *Brighton's land development will contribute to a walkable, complete neighborhoods*
- 4.** *Brighton's transportation system will expand concurrently with growth and/or demand*

# Project Background

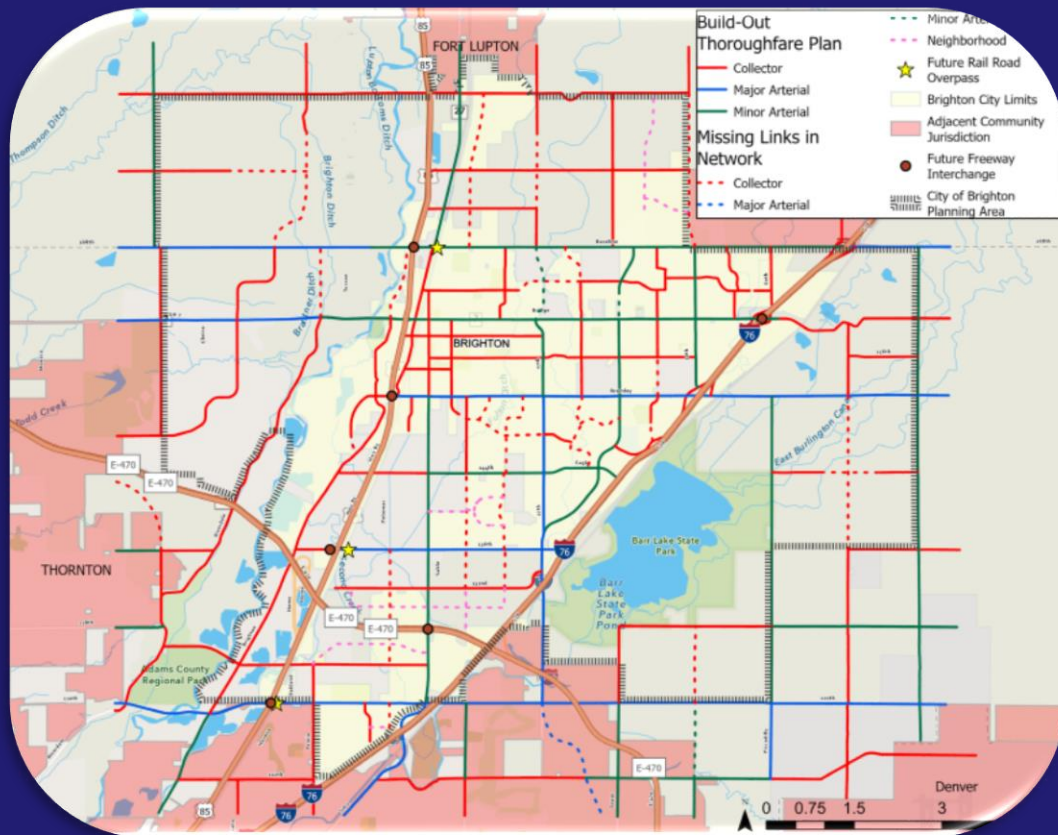

## Strategic Objectives

1. Safety First
2. Network Approach
3. Modal Balance
4. Growth Management
5. Technology
6. Major Capital Projects
