Division 10

Urban Agriculture

Sec. 6-4-900. Urban agriculture and small animal husbandry

(a) **Purpose and Intent.** The purpose of these regulations is to permit limited small animal husbandry uses within urban residential environments. The regulations below are intended to permit poultry and beekeeping with reasonable limitations, while preventing negative impacts that may occur during large operations or poorly educated practices to maintain the health benefits of local and small scale food production.

(b) **Applicability.** The regulations below apply to single family detached properties where farming is not permitted by Chapter 17 Land Use and Development Code of the Brighton Municipal Code, as it may be amended. The regulations below shall not restrict farming uses already permitted within the Agricultural/Residential (A/R) and Agricultural Estate (A/E) zone districts or specific provisions of a Planned Unit Development (PUD) district which specifically permit agricultural uses with higher densities than what is contained within this Section.

(c) **Location.** In order to ensure adequate care and minimal negative impacts to surrounding property and property owners, the following regulations shall only apply to single family detached structures being used for residential purposes. Regulations and permits, as applicable, for urban agriculture may be permitted within City owned parks and open space properties as determined by the City of Brighton Parks and Recreation Department.

(d) **Use Consent.** The keeping of bees or poultry as provided in this Section may occur on properties zoned for and used as a single family detached property under the ownership of the person keeping the poultry or bees or by a tenant or occupant of the premises with the written consent or permission of the property owner, manager or person in control thereof, or the homeowner's association for any property located in a common-interest development. The required consent shall be obtained prior to establishing any use within these regulations. The written consent or permission by the property owner, manager, person in control thereof or the homeowner's association for a common interest development shall be kept available at the location of the bee or poultry keeping to be produced by the person keeping the poultry or bees or an occupant of the premises upon request of any officer or agent of the City. Nothing in this Subsection 6-4-900(D) shall be deemed to require the City's agents or officers to secure the required written permission of the owner, manager, person in control of the premises or homeowner's association, and it shall be the sole responsibility of the person keeping the bees or poultry or occupant of the premises to do so.

(e) **Use Regulations.**

(1) **Poultry Keeping.**

a. **Good practices required.** Poultry shall be properly kept by providing sufficient shelter for protection from weather and predators. The shelter shall be cleaned regularly to prevent infestation, disease, or rotten eggs and other disagreeable odors from emanating beyond the property line.

(i) Removal and disposal of poultry waste and feces shall be in accordance with Sections 6-4-400 and 6-4-410, as the same may be amended. No animal waste or feces shall be disposed of or allowed to enter into the sanitary sewer system without the prior written approval from the City Department of Utilities.

b. All shelters shall be located and maintained in accordance with the setback and height regulations for accessory structures for the applicable zone district in which the property is located. The construction, expansion or maintenance of structures and the installation of any heating or lighting elements shall be approved through the applicable building permit process.

c. Food and fresh water shall be provided and maintained for the poultry. Feed shall be stored and served within a building or structure in a rodent-proof container.

d. The slaughter of poultry shall be performed off-site or in a location shielded from public view. If performed on-site, the meat shall only be used for personal use, and all remains must be properly disposed of in a safe and sanitary manner and in accordance with Sections 6-4-410 and 6-4-430, as they may be amended, as they relate to disposal of waste.

e. **Number of animals.** In addition to the limits of domestic pets as provided in Section 6-4-440, as the same may be amended, a person may keep

up to six (6) domestic poultry in any combination of permitted types and species as listed in subsection f. below.

f. **Poultry type.** Only chickens and/or ducks shall be kept on properties for residential use as permitted under this Section 6-4-900, as it may be amended. Male chickens (roosters), turkeys, geese, guinea fowl, pheasants, peafowl, and large birds such as ostriches and emus shall be prohibited. Doves and pigeons caged outside of the residence shall also be considered poultry keeping and subject to the restrictions of this Section 6-4-900, as the same be amended from time to time. Doves and pigeons caged inside a residence shall be considered a household pet and shall meet the requirements set forth in Article 6-4-440(c), as the same may be amended.

(2) **Apiculture.**

a. **Good practices required.**

(i) Only the common honeybee (*apis mellifera*) may be kept and raised within City limits. The keeping of any other bee type is strictly prohibited within City limits.

(ii) Non-aggressive queens shall be selected for the generation of the colony. Any colony which exhibits unusual aggressive characteristics shall be re-queened.

(iii) The hive shall be built and designed for regular maintenance and upkeep. It shall have proper ventilation and be elevated off the ground to prevent swarming and weather damage.

(iv) Hives should be worked safely and at appropriate times according to the season and time of day, without the presence of neighbors and other public, and using the proper safety equipment.

(v) A convenient water source shall be provided for the hive(s). A clear path between the hive(s) and the water source shall be evident so that the honeybee flight path does not create a nuisance to persons or pets when entering and exiting the hive.

b. **Hive location.** All hives must be placed no closer than fifteen feet (15') from any property line, or public right-of-way, and must be located behind the front setback of the house. Optimal hive orientation and the installation of flyway may be used to reduce the setback requirement to a minimum of five feet (5') from the property line or public right-of-way. Said reduction shall be permitted if the following conditions are met:

(i) A flyway is provided between the hive and the property line(s) and/or public area which requires the bees to fly upward from the hive. At a minimum, the flyway shall consist of a solid wall, fence, dense vegetation or some combination thereof which is a minimum of six feet

(6') in height and extends a distance beyond the hive to properly direct the bee fly pattern. The flyway must be properly maintained and repaired to ensure functionality of the flyway. The City may require the relocation of the hive(s) including additional requirements or setbacks should evidence exist which indicates that the flyway does not shift the bee fly pattern above six feet (6') at the property line or public right-of-way.

(ii) The entrance to the hive shall be oriented to face towards the interior of the property with a minimum of a ten foot (10') clear path to deter contact with humans and domestic pets.

c. **Hive density.** The number of hives permitted for each beekeeper will be determined by the size of the property in which the hive(s) will be located, as follows:

(i) One-half acre (21,780 square feet) or less shall have a maximum of two hives;

(ii) More than one-half acre (21,780 square feet) but less than one acre (43,560 square feet) shall have no more than six hives;

(iii) One acre (43,560 square feet) or more shall have no more than eight hives.

Hives located on any property which maintains a minimum 200' setback from any property line or public right-of-way shall be exempt from the density limits listed above.
