

SPI Interconnect Easement Transfer

Presenting: Curtis Bauers, Utilities Director

Strategic Focus Areas

Financially Responsible

Strong Regional
Relationships and
Partnerships

Supportive, Sustainable
Infrastructure

Introduction

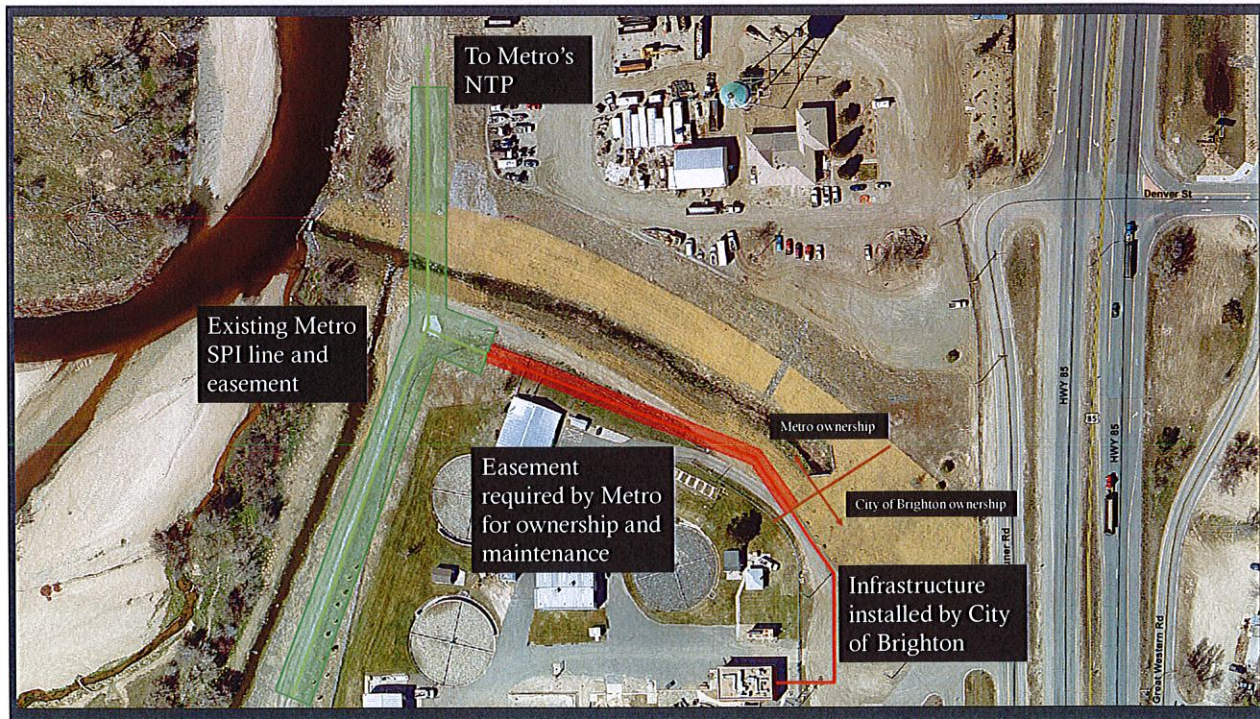

- ◆ Project Background
- ◆ Project Details
- ◆ Final Recommendation

Project Background

- ◆ The South Platte Interceptor Interconnect (SPI) project connects the City's Waste Water Treatment Plant (WWTP) to Metro's Northern Treatment Plant (NTP)
- ◆ The project was originally bid in July 2016 and was approved by Council on August 2, 2016
- ◆ T. Lowell completed construction in April 2018
- ◆ Since completion, the City has been working with Metro on transferring the ownership and maintenance responsibilities from the City to Metro

Project Details

- ◆ The City and Metro came to agreement on the easement language and are ready to proceed with the signing of the agreement
- ◆ Once the easement is transferred, the City can begin sending flows to Metro's NTP

Final Recommendation

- ◆ City staff believes approving the easement is in the best interest of the City going forward
- ◆ Approving will allow the City to provide waste water flows to Metro's NTP per the existing agreement between the City and Metro
- ◆ Approving the easement will also alleviate the City from having to maintain any of the infrastructure within the easement boundaries
